

BEDGEN 40[®] AS PLUS

DIGESTIVE SYSTEM BOOSTER

Premix of additives that improves production parameters.

BENEFITS

- Increases bile formation and secretion.
- Enhances the liver detoxification capacity.
- Improves technical indicators (weight, FCR, mortality).
- Increases the absorption of fat-soluble vitamins, calcium, and pigmenting agents.
- Improves the hatching rate and egg quality.

BEDGEN 40® AS PLUS

*DOSE

Administer orally, mixing with feed.

The dose may vary depending on the target species and is subject to the attending veterinarian's criteria. The recommended dose for poultry is from 150 to 300 g per tonne of feed. For use with other species, check with the manufacturer. For easy mixing with feed, it is advisable to make a premix using 1 part of BEDGEN 40® AS PLUS in 10 parts of feed supplement before incorporating it into the final mixture.

PRESENTATIONS 5 and 25 kg bags

PRODUCT AVAILABLE FOR EXPORT OUTSIDE EUROPE.
