

FRONT

BEDSON

Since our founding in 1979, we have built a track record of excellence as a multinational company, leading the way in research, development, production, marketing, and distribution of specialty products designed for intensive animal protein production. Our production capacity in Argentina and Spain enables us to meet the needs of diverse and constantly evolving markets while maintaining the highest quality standards.

With an international network of wholly-owned subsidiaries in 8 countries across 5 continents and a commercial presence spanning more than 50 countries, we continue to strengthen a global vision based on proximity to each market, adaptation to different production realities, and a sustained commitment to innovation.

Our product range, which includes high-quality antibiotics, feed additives, immunostimulants, antipyretics, and energizing multivitamins, reflects our commitment to optimizing production results and promoting animal welfare at every stage. Our path, guided by innovation and flexibility, is a testament to our ongoing dedication to offering effective, reliable solutions aligned with dynamic

BEDGEN 40[®] ST PLUS

THE TRIPLE ACTION
AGAINST MYCOTOXINS

Soluciones y tecnologías para la salud animal

POULTRY
DIVISION

BEDGEN 40® ST PLUS

The triple action against mycotoxins, combining binders + metabolism and elimination. It is specially active against Aflatoxins and Ochratoxins.

Mitigating mycotoxicosis means sustaining productivity, health, and the sustainability of our production.

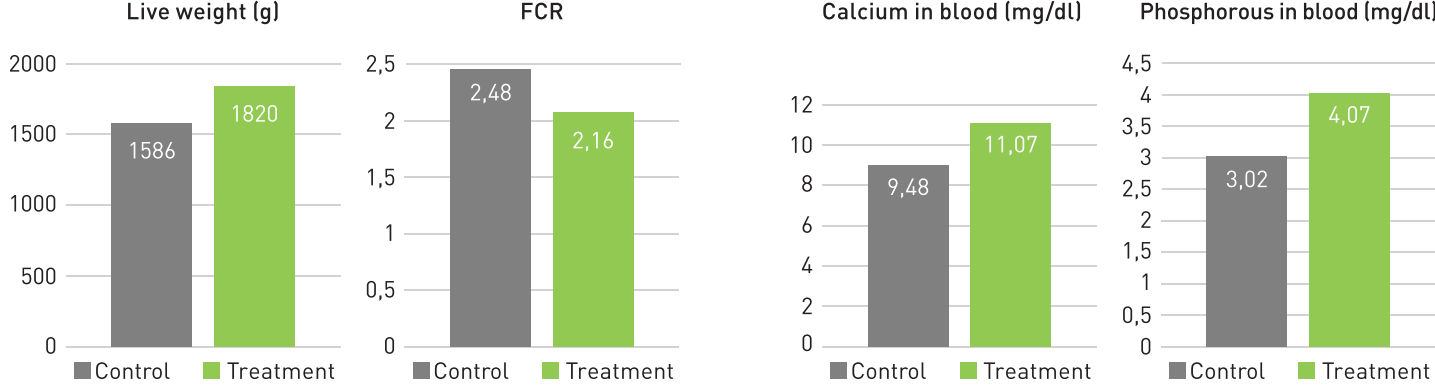

WHAT IS BEDGEN 40® ST PLUS?

BEDGEN 40® ST PLUS is a feed additive that offers protection against mycotoxins. It binds mycotoxins in the gastrointestinal tract and protects organs, promoting health and productive performance.

BEDGEN 40® ST PLUS PROVIDES A COMPLETE ACTION AGAINST MYCOTOXICOSIS.

The combination of diatomaceous earth, a fossil matrix with a high broad-spectrum binding capacity, together with the protective effect of its functional components, maximizes results, as the mycotoxins that may have been absorbed are ultimately metabolized and excreted via the biliary route. On the other hand, lipotropic properties of choline are well known, by helping liver function.

42-day use of BEDGEN 40 with naturally contaminated poor-quality feed (with high levels of *Aspergillus*, *Fusarium*, *Penicillium*, and others).

✓ BENEFITS

- Absorbs a broad spectrum of mycotoxins (like aflatoxins, ochratoxins and zearalenone), mitigating their toxic effects through direct action.
- Promotes protection of target organs and detoxification via the biliary route.
- Supports hepatic metabolism and bile production.
- Enhances the absorption of lipids and lipophilic nutrients, such as fat-soluble vitamins (A, D, E, and K).
- Optimizes digestion and intestinal health.
- Helps preventing fatty liver.
- Reduces oxidative stress and improves physiological status.
- Promotes weight gain and performance.

INDICATION:
BEDGEN 40® ST PLUS is indicated for use in intensive farming, in all animal species, according to the criteria of the attending professional.

COMPOSITION:
Each 100 g contains:
Flavoring (2b) – CoE 565 Artichoke extract.....1.0 g
Vitamin (3a890) – Choline chloride.....3.5 g
Diatomaceous earth and silica q.s.....100 g

ADMINISTRATION AND DOSAGE:
Administer orally, mixed with feed. It is recommended to incorporate into the feed at a rate of 0.5 kg to 1.0 kg per ton of feed, although the dose may vary depending on the target species and is subject to the criteria of the attending professional.

PRESENTATION: 25 kg bags.
