

NON NUTRITIONAL FOOD ADDITIVE

# CLOXITAM®

ENHANCER OF FOOD  
EFFICIENCY

- Improves intestinal health
- Improves productive parameters
- Improves nutritional efficiency

## MAIN CHARACTERISTICS

- Cloxitam® is a premix of food additives intended for animal feed, whose activity is based on active ingredients identical to natural present in aromatic plants (Oregano and Cinnamon) .
- Cloxitam® improves productive performance due to its direct action on the intestine, enhances the performance of enteric metabolism increasing nutrient absorption, fostering better productivity in general.
- Cloxitam® is the food additive of choice as its preventive use of bacterial disorders at the intestinal level.

## BENEFITS

- Encourages beneficial gut microbiota to the detriment of potential pathogens.
- Promotes a better performance of the immune system.
- Improves the feed conversion rate.
- Increases the production of volatile fatty acids in the intestine which contributes to greater bioavailability of food energy.
- Improves the intestinal absorption area and the ratio of villi height /depth of the crypt, thereby improving the area of nutrient absorption.

## INDICATIONS

Cloxitam® is specified for use as an additive in balance food for birds, pigs, aquaculture species and others. Suitable for all growth stages, improving general performance of animals.

## CLOXITAM®

### \*DOSE

Birds and pigs from 100 g to 300 g/Tn of feed.  
Fish from 500 g to 1Kg/Tn of feed.

### USAGE MODE

Provide orally mixed with food.  
Its suggested to make premix using 1 part of Cloxitam® in 10 parts of core or feed before incorporating into the final mix to facilitate blending.

\*Dose according to criteria of the acting vet.
